

<b>Study programmes:</b> Bachelor studies - Informatics			
<b>Course name:</b> R290 - Software Development			
<b>Lecturers:</b> Saša Malkov and other lecturers at Department of computer Science			
<b>Status:</b> Compulsory			
<b>ECTS:</b> 6			
<b>Attendance prerequisites:</b> P100, P101, P102, P103			
<b>Course aims:</b> Master the basic techniques of modern software development, including teamwork.			
<b>Course outcome:</b> Upon completion of the course, the student mastered the basic modern software development techniques and gained some experience in their application and teamwork.			
<b>Course content:</b>			
<ul style="list-style-type: none"> <li>- The problem of software development. Overview of contemporary software development methodologies. UML. Agile software development. Extreme programming.</li> <li>- C ++ Programming Language. Distinctive characteristics, standard library, templates.</li> <li>- Modern software development techniques. Design patterns. Refactoring. Unit testing. Test driven development. Concurrent programming. User interface design principles.</li> <li>- Software architecture and software design. Cohesion and coupling. Principles of software design. Event driven architectures. Software metrics.</li> <li>- Software tools and development environments. Qt. Version control systems. Systems for tracking tasks and problems.</li> </ul>			
<b>Literature:</b>			
<ol style="list-style-type: none"> <li>1. Erich Gamma, Richard Helm, Ralph Johnson, John Vlissides, Design Patterns: Elements of Reusable Object Oriented Software, Addison-Wesley, 1995. [CET, 2002]</li> <li>2. Martin Fowler, Refactoring: Improving the Design of Existing Code, Addison-Wesley, 1999. [CET, 2003]</li> <li>3. Stanley B. Lippman, Josee Layoie, Barbara Moo, C++ Primer, 4th ed., Addison-Wesley, 2005.</li> <li>4. Robert C. (The lecturer can choose another relevant current literature)</li> </ol>			
<b>Number of hours: 5</b>	<b>Lectures: 2</b>	<b>Tutorials: 3</b>	<b>Laboratory: -    Research: -</b>
<b>Teaching and learning methods:</b> Frontal lectures, group and individual tutorials and exercises.			
<b>Assessment (maximal 100 points)</b>			
<b>Course assignments</b>	<b>points</b>	<b>Final exam</b>	<b>points</b>
Lectures	-	Written exam	-
Exercises / Tutorials	-	Oral exam	-
Colloquia	25	Written-oral exam	55
Essay / Project	20 (group project)
